# Designing for Modern Learning: Transcending the Limitations of ADDIE and SAM

## Embracing a Human-Centered Approach to Create Personalized, Engaging, and Effective Learning Experiences

In the rapidly evolving landscape of education, traditional instructional design models like ADDIE (Analysis, Design, Development, Implementation, and Evaluation) and SAM (Successive Approximation Model) are increasingly proving to be inadequate. These models, while once effective, fail to fully address the complexities and nuances of modern learning.

Designing For Modern Learning: Beyond ADDIE and SAM is a groundbreaking book that challenges the status quo of instructional design. It introduces a revolutionary approach that places the learner at the heart of the design process, ensuring that learning experiences are personalized, engaging, and tailored to the individual needs of each learner.
