

Discover the Montessori Method: A Path to Nurturing Children's Natural Learning Abilities

The Montessori Method is a revolutionary approach to education that has been used for over 100 years. Developed by Italian physician and educator Maria Montessori, the method is based on the belief that children have an

innate desire to learn and that they learn best through hands-on experiences.

The Montessori Method is characterized by its focus on child-centered learning. Children are given the freedom to choose their own activities and to learn at their own pace. The environment is designed to be stimulating and supportive, and the teacher serves as a guide, helping children to develop their independence and self-confidence.
