Based on an in-depth study of 43 of the world's most successful companies, *In Search of Excellence* identifies eight key management principles that drive organizational excellence:

- **A bias for action:** Successful companies are not afraid to take risks and make decisions. They are constantly experimenting and innovating.

- **Close to the customer:** Excellent companies understand the needs of their customers and are constantly striving to meet those needs.
- **Autonomy and entrepreneurship:** Successful companies empower their employees to make decisions and take ownership of their work.
- **Productivity through people:** Excellent companies invest in their employees and create a work environment that fosters productivity and creativity.
- **Hands-on, value-driven:** Successful companies are led by hands-on managers who are focused on creating value for their customers and employees.
- **Stick to the knitting:** Excellent companies stay focused on their core competencies and avoid diversifying into areas where they do not have expertise.
- **Simple form, lean staff:** Successful companies have simple organizational structures and lean staff levels. They avoid bureaucracy and unnecessary complexity.
- **Simultaneous loose-tight properties:** Excellent companies are able to balance autonomy and control. They give their employees the freedom to innovate while also maintaining a strong sense of direction and purpose.

In addition to these eight principles, *In Search of Excellence* also provides a wealth of case studies and examples that illustrate how these principles can be applied to businesses of all sizes and industries.
