Low-Stress EnvironmentsCreate calm and predictable environments where livestock can feel relaxed and minimize their anxiety. Provide ample space, shelter from extreme temperatures, and access to fresh water.

Gentle RestraintUtilize non-aversive restraint methods such as squeeze chutes, head gates, and panels that immobilize animals without causing discomfort. Avoid using ropes or chains that can cause pain or injury.

Proper Handling TechniquesHandle livestock with respect and care, using gentle movements and avoiding sudden noises or gestures. Approach animals calmly and from the front, allowing them to see you.

Specialized EquipmentInvest in specialized equipment such as loading ramps, non-slip floors, and handling gloves to ensure safe and efficient handling. Regularly inspect and maintain equipment to prevent accidents.
