Markdown is a lightweight markup language that you can use to add formatting elements to plaintext documents. It was created by John Gruber in 2004 as a way to create formatted text that is easy to read and write. Markdown is now used by millions of people around the world, and it is supported by a wide variety of software applications.

Getting Started

To get started with Markdown, all you need is a text editor. You can use any text editor you like, but some of the most popular options include:

- Sublime Text
- Atom
- Visual Studio Code
- Notepad++

Once you have a text editor installed, you can start writing Markdown documents. Markdown documents use a simple syntax that is easy to learn. The following table lists some of the most common Markdown syntax elements:

Syntax	Description
#	Heading
##	Subheading
***	Horizontal rule
*	UnFree Downloaded list item
1.	Free Downloaded list item
bold	Bold text
<i>_italic_</i>	Italicized text
<code>`code`</code>	Code block
<code>[link text](link url)</code>	Link
> quote	Blockquote

Examples

The following are some examples of Markdown documents:

```
# Markdown Document ## This is a subheading This is a paragraph of text.
```

As you can see, Markdown is a very simple and easy-to-use markup language. It is perfect for creating formatted text documents that are easy to read and write.

Markdown is a powerful tool that can be used to create a variety of different types of documents. It is easy to learn and use, and it is supported by a wide variety of software applications. If you are looking for a way to create formatted text documents that are easy to read and write, then Markdown is the perfect solution for you.
